

Consent Form - Men providing sperm for research

Version 5, 8 February 2023

Indicators of Oocyte and Embryo Development

HFEA Centre Number: 0013
IRAS Study Number: 65414
Name of Researcher: Prof Geraldine Hartshorne

1	I confirm that I have read and understand the Information sheet (version 5, 8 February 2023) for the above study. I have had the opportunity to consider the information, ask questions and have had these answered satisfactorily. I have been offered the opportunity for counselling.	Initials
2	I understand that my participation is voluntary and that I am free to withdraw (by written confirmation to the principal investigator) at any time until my samples are used, without giving any reason, without my medical care or legal rights being affected.	Initials
3	I understand that responsible individuals authorised by the Centre for Reproductive Medicine may look at my medical notes. I give permission for them to collect medical history data where it is relevant to my taking part in this study.	Initials
4	I understand that the research project may include genetic and other tests. I understand that I will not receive any information about the results of these tests for embryos that I donate to research.	Initials
5	I wish to donate my fresh or frozen sperm samples for use in the above study	Initials
6	I agree to take part in the above study	Initials
7.	I consent to storage of my sperm for use in research	Initials
8	At the end of the study, I agree that my sperm and data can be kept for future research	YES/NO

Consent for Sperm or Embryo Storage for Research Purposes

9	<p>Please read the following information: (note, a gamete is an egg or a sperm)</p> <ul style="list-style-type: none"> By law (the Human Fertilisation and Embryology Act 1990 (as amended)), you need to give your written consent if you want your gametes or embryos created with your gametes to be stored for use in research purposes. If you are storing your gametes or embryos, you must state in writing how long you consent to them being stored for research purposes. The law permits you to store gametes for any period up to a maximum of 55 years from the date they are first placed in storage. Embryos can only be stored for research purposes if both gamete providers give their consent to storage and use in the project. 	
---	---	--

	<ul style="list-style-type: none"> The maximum period for storage of embryos for research purposes is 10 years from the date you sign the consent to storage form. If consent is given to the storage of embryos for research purposes by different persons on different days, the reference to the day on which consent was given is to be taken as a reference to the last of those days. If the time periods for storage for research purposes given by each gamete provider are different, the embryos can only remain in storage for the lesser of the time periods. 	
10	I consent for my sperm to be stored for research purposes for 55 years (or if a shorter time, please write the amount of time here <input type="text"/>)	Initials
11	I consent for embryos created using my sperm to be stored for research purposes for 10 years (or if a shorter time, please write the amount of time here <input type="text"/>)	Initials
