

Centre for Hearing and Balance Disorders (Audiology)

Access to an ENT Consultant following Transition to Adult Services at the end of Year 11

Today is your final yearly hearing assessment as you will now be transferred to the Adult Audiology Services. If you have future concerns regarding your hearing then you should go to your GP and ask for a referral to an ENT consultant.

Following transition to adult services you should no longer access your ENT consultant via your paediatric audiologist as you will now be considered an adult.

If you have not seen an ENT consultant for over 12 months then you should go to your GP and ask for a re-referral.

If you see your ENT consultant regularly then you should phone their secretary at your local hospital and ask for an appointment.

If you have been referred to the ear care nurse for routine wax removal then you can continue doing this into adult services.

Patient Information

If you have any further queries about access to ENT then please contact your named Paediatric or Adult Audiologist on 024 7696 6444.

Accessing Audiology and ENT services when you are away at college/university

This will naturally vary depending on where you attend university.

We recommend that you register with your student medical practice and find out via the doctor (before you need it) where the local Audiology and ENT Departments are.

You are still able to access local audiology services in Coventry for your regular hearing aid/ear mould support and maintenance. However, this may be through a different provider (via your GP) or at the Centre for Hearing and Balance Disorders. Accessing local audiology services will be discussed with you in your transition appointment and relevant information provided.
