

Ophthalmology

Going home after a Conjunctival Repair Procedure (after Glaucoma Surgery)

Banda Label

This booklet aims to give you the information you need whilst recovering from a conjunctival repair procedure (after glaucoma surgery).

Today

You may have an eye pad /eye shield in place

If so, then **remove** the eye pad inhours.

Important: If you are sent home with an eye pad and/or eye shield you **should not drive back home.**

- You are likely to experience some eye irritation for a few days
- Your eye may be quite red and watery

Patient Information

You may experience some discomfort. Take pain relief, such as paracetamol, ibuprofen (unless any other health problems prevent this) or your usual pain relief medication. Please ask for advice if you are not sure.

Cleaning the eye

- Wash your hands
- Remove the eye dressing
- Dip a sterile cotton wool ball into the cooled previously boiled water and squeeze to remove the excess water
- Wipe the eyelids gently from the bridge of the nose outwards. Discard after each wipe.
- Make sure that the eye ball is not pressed during cleaning.
- Repeat until the eye lids appear clean.
- Wash your hands
- Instil drops as instructed

Patient Information

Eye drops

Staff will give you instructions about your eye drops. The chart below will help to remind you when to instil your drops.

Medication Name	8 AM	10 AM	12 NOON	2 PM	4 PM	6 PM	8 PM	10 PM

Please **do not** put all eye drops in at the same time. Keep a minimum gap of 10 minutes between individual eye drops.

If you should require additional drops, please obtain fresh supplies from your own GP.

Eye shield

Wear the eye shield every **night for one week**. This is to make sure you do not accidentally rub your eye whilst asleep. Secure with surgical tape.

Care of the eye shield

Wash the eye shield in running water. Use soap and rinse thoroughly. Dry with a clean tissue.

What you can do

- Walking (be careful on the stairs);
- Watching television;
- Reading;
- Most normal daily activities except activities requiring straining;
- Move around the house in a normal way and bend **on knees carefully**;

Patient Information

- Wear sunglasses outside in windy weather and/or bright sunlight;
- Shower from the neck down. Back wash your hair for the first week.

What you should avoid

- Rubbing your eye;
- Any vigorous activity including contact sports, squash, badminton and swimming;
- Sudden bending, lifting heavy weights, and straining;
- Driving until you have seen your doctor for your review and you are able to read the new style car number plate at 20 metres and the eye is comfortable;
- Eye make-up until your doctor confirms that the eye has healed fully;
- Splashing water into the eye;
- Getting soap or shampoo in the eye;
- Dusty atmospheres.

Travelling abroad

It is advisable to discuss any travel plans in advance with the surgeon.

Please inform the hospital if:

- Your eye becomes **more red** or **more painful** than the day you went home;
- Your eye develops a sticky discharge;
- Your vision begins to deteriorate;
- Your eyelids get swollen
