

Urology

UHCW Prostate Cancer Support Group

What is a urological cancer?

Urological cancer includes cancer of the kidney, bladder, prostate, testicles and penis.

Who are we?

We are a support group for men and women suffering from prostate cancer, and also for their partners, carers and loved ones. We provide the opportunity to talk to other members of the group about their treatments and experiences. There will be specialists and visiting guests, medical or otherwise, who will be attending and can offer their expertise and general advice.

Aims and objectives

- Offer emotional support and information to all those affected by prostate cancers;
- Support each other through diagnosis, treatment and expectations;
- Giving time and space to talk about fears and concerns in a non-discriminatory and open environment;
- Listen and respond with sensitivity, respecting confidentiality and not imposing personal preferences and values on others;
- Discuss improvements to health and cancer care based on members experiences;
- To encourage and facilitate survivorship;
- Provide a safe and open environment to share experiences and emotions which can be addressed in a kind, supportive and non-judgemental manner.

Patient Information
