

Patient Information

## Department of Urology

# Frequency volume chart

Please complete this chart for **three consecutive days before** attending for your Urodynamics Studies test at University Hospital Coventry and Warwickshire.

It is essential that we have this information as it forms an important part of the test.

Use a jug to measure the amount of urine that you pass and enter the amount in the box marked **urine** at the appropriate time. If you are unable to measure the volume (e.g. if you are at work) then put a tick in the box instead.

In the box marked **fluid** please mark when you have had a drink. In the box marked **wet** please tick if you have leaked urine

Please note – the amounts should be in millilitres (mls) for example 200mls. This measurement is usually found on the side of a measuring jug.

Here is an example:

Time	Day 1			Day 2			Day 3		
Volume	Fluid	Urine	Wet	Fluid	Urine	Wet	Fluid	Urine	Wet
7am	350mls						100ml		
8am				300ml					
9am	220 mls						125ml
