Semen Analysis Laboratory Request Form

IMPORTANT INFORMATION

APPOINTMENTS (Appointments are from 9 am to 3 pm, Monday to Friday)

An appointment is required to deliver a semen sample for analysis. **Samples will not be accepted without an appointment.**

To arrange an appointment, or raise a query telephone the Andrology Laboratory, Centre for Reproductive Medicine on:

(024) 76 968873

SEMEN PRODUCTION

- + Your semen sample **MUST** be produced at home. It **MUST** arrive at the laboratory within 60 minutes of production and be kept at body temperature in transit.
- + The semen sample should be collected by masturbation making sure **ALL** the fluid is collected into the sterile container you have been provided. If any of the sample is lost please note this on your form or on the sample container.
- + Your semen sample must be collected under conditions of cleanliness. We therefore ask that you wash your penis thoroughly with water before producing the specimen.
- + We strongly recommend a 2-3 day period of sexual abstinence prior to producing any specimen for analysis. This will make sure that we are provided with the best quality sample possible. It is not advisable to abstain for any longer than 7 days as this may reduce the quality of your semen sample.

+ **IT IS ESSENTIAL THAT YOU:**

- 1) Label your specimen pot clearly with your name and date of birth.
- 2) Fill in the form completely. It is essential that the shaded area is completed.
- 3) Return your sample as directed, at your appointment time. Samples arriving late will not be processed.
